CONVENTUS-NAVVIS: Helping Physicians Succeed in Value-Based Care

“Navvis has supported our population health initiatives by providing an exceptional technology support platform, care management people support, and facilitating payer relationships. This was provided at no cost and led to increased revenue to our primary care practices.”

*Jon M. Regis, M.D., CEO/President
Reliance Medical Group*

“The Conventus team worked with our practice to identify the negative payment adjustments we were receiving. They reviewed our workflow and processes and created a step by step plan that helped us avoid negative penalties we would have incurred. They worked with us on selecting appropriate key quality measures and trained us on how to successfully complete value-based actions.”

Dr. Olga Maimon, & Dr. Lev S. Simkhayev

Support for Your Practice and Patients

- Practice Optimization Managers work with your staff to enhance office workflows and provide up to date data and insights on your patient population
- Care navigators and coordinators to engage with patients in support of your care plan
- Actionable data analytics to help improve the quality and efficiency of care to your patients
- Real-time observation of patients to identify patient needs and guide patients back to your office for care

Exclusive Benefits for Conventus Member Insured

- Assistance in coordinating value-based care (VBC) programs. Setup practice for success in meeting quality reporting for necessary programs to avoid penalties in VBC models
- Collaborative support for existing programs to positively drive outcomes. We engage, guide, and support patients across the continuum of care
- Customizable practice tools and resources dedicated to reducing risk and promoting patient safety and patient centered care

Technology That Fits Into Your Workflow

- Our Coreo platform integrates with your EHR and aggregates data from all sources for real-time insights
- We provide easy to understand reports, analysis, and data-driven insights
